

SWEECC- Shanghai, China
 October 17-19, 2018
IPB 2018
 International Powder & Bulk Solids Processing
 Conference & Exhibition

Join IPB - meet the flourishing market in China

Following the rapid development of high technology and new material industries in China, the demand for powder and bulk technologies and applications is constantly growing.

IPB is the only international trade fair in the field of powder, granule and bulk solids technology held by the NürnbergMesse China and Chinese Society of Particuology, which is the leading powder/bulk exhibition in China.

IPB focuses on the latest products and its supporting programs present the new technologies in fields such as: particle preparation, grading, dispersion, surface modification, separation, storage, transportation, packaging, mixing, granulation and particle measurement and many others.

Product group

- **Basic mechanical processing technologies**

Size reduction, mixing, separating, screening, filtering, drying of powders and bulk solids

- **Plant engineering and processing components**

Dosing, emptying, conveying, transporting, storage, vacuum plants, pipe technology, recycling plants, weighing, packaging & filling

- **Particle analysis and characterization**

Particle analysis, sampling equipment, laboratory instrument

- **Nano particle technologies**

- **Measurement and control**

Displays, flow meters, pressure gauges, level indicators, process controls

- **Safety and environmental technologies**

Industrial fire protection, electrical explosion protection, non-electrical explosion protection, process safety, emission protection, workplace safety

- **Services**

Engineering offices, research institutes, universities and technical publications
